1. Executive Summary

Zia Pizza operates a React-based single-page application (SPA) website serving three locations in Wiltshire, England -- Westbury, Salisbury, and Trowbridge. While the brand has a solid product offering with authentic Italian pizza and strong customer reviews (96% recommendation rate at Westbury), the website suffers from **critical technical SEO deficiencies** that severely limit its search visibility and organic traffic potential.

Health Scorecard at a Glance

Category	Score	Status
Technical SEO	2/10	Critical
On-Page SEO	3/10	Poor
Site Performance	3/10	Poor
UI/UX Design	5/10	Average

Local SEO	3/10	Poor
Content Strategy	2/10	Critical
Mobile Experience	4/10	Below Average
Accessibility	2/10	Critical
Privacy Compliance	1/10	Critical
Social Media	3/10	Poor
Overall	2.8/10	Critical

Top 5 Critical Findings

- No Server-Side Rendering (SSR)** -- The entire site is a client-rendered SPA. Search engines that don't execute JavaScript see a completely blank page.
- GDPR Non-Compliance** -- 5 tracking scripts (including Microsoft Clarity session recording) fire without any user consent mechanism.
- No Sitemap or Structured Data** -- No XML sitemap exists, and zero schema markup is implemented despite being a multi-location restaurant.
- 11.6 MB Image Payload** -- Unoptimized images with no modern formats, no lazy loading, and no responsive image markup.
- Domain Fragmentation** -- Brand presence is split across 3+ domains, severely diluting SEO authority.

2. Business Overview

Company Profile

Detail	Information
Legal Entity	Zia Pizza Ltd
Companies House #	07485174
Founded	2011 (under Chef Vittorio Capetti)
Current Ownership	Nidhin Sajeew & Aleena (acquired 2024)
Locations	3 (Westbury, Salisbury, Trowbridge)
Cuisine	Authentic Italian pizza, pasta, and pub food
USP	24-hour cold-fermented dough, imported Italian ingredients

Location Details

Location	Type	Address	Phone
Salisbury	Express Restaurant	46 Silver St, Salisbury, SP1 2NE	01722 433829
Westbury	Express Restaurant	15 Palomino Pl, Westbury, BA13 3SD	+44 1373 865271
Trowbridge	Country Pub (The Lamb on the Strand)	99 The Strand, Trowbridge, BA14 6LL	+44 13805 03525

Service Channels

- Dine-in at all 3 locations

- Online ordering via food-order.net (EPOS Hybrid)
- Delivery via Just Eat, Uber Eats, and Deliveroo
- Table booking via eposhybrid.uk

3. Technical SEO Standing

3.1 Architecture & Rendering

Element	Current State
Platform	React Single Page Application (SPA)
Build Tool	Vite
Server	nginx 1.29.0
CSS Framework	Tailwind CSS
UI Library	Radix UI
Animation	Framer Motion
Server-Side Rendering	None -- client-side only

Critical Finding: Every URL returns the identical HTML shell containing only `<div id="root"></div>` with zero content. All page content is generated via JavaScript after the 544 KB bundle downloads and executes. Search engines that don't execute JavaScript (Bing, social media crawlers, most bots) see a completely blank page.

3.2 Indexation & Crawlability

Element	Status	Assessment
Indexed Pages	~6 pages	Extremely thin for a 3-location business
robots.txt	Present, allows all crawlers	Missing Sitemap: directive
sitemap.xml	Does not exist	Returns SPA HTML shell instead of XML
Canonical Tags	Missing entirely	No <code><link rel="canonical"></code> on any page
404 Handling	Soft 404s	All non-existent URLs return HTTP 200
URL Structure	Clean, human-readable	Good paths: /menu, /about, /location/salisbury

3.3 Domain & Redirect Status

Issue	Current State
www vs non-www	Both serve identical content -- no redirect between them (duplicate content)
HTTP to HTTPS	Correctly redirects via 301
Domain Fragmentation	Brand split across: ziapizza.co.uk , westbury.ziapizza.co.uk , ziapizzaonline.co.uk , ziapizzaltd.com
ziapizzaonline.co.uk	Contains only a JavaScript redirect with zero indexable content

3.4 Security Headers

Header	Status	Value
Strict-Transport-Security	Present	max-age=15768000 (~6 months)
X-Frame-Options	Present	SAMEORIGIN
X-XSS-Protection	Present	1; mode=block (deprecated)
X-Content-Type-Options	Present	nosniff
Referrer-Policy	Present	strict-origin-when-cross-origin
Content-Security-Policy	Missing	Not implemented
Permissions-Policy	Missing	Not implemented

3.5 Analytics & Tracking Implementation

Tool	ID	Status
Google Tag Manager	GTM-MX6F7W6M	Active
Google Analytics 4	G-34HBQJ92JF	Active
Google Ads	AW-16919570722	Active
Microsoft Clarity	va1q26fm34	Active (session recording)
Facebook/Meta Pixel	1593283908574605	Active

All tracking is well-implemented from a technical standpoint, but fires without consent (see Section 12).

4. On-Page SEO Standing

4.1 Title Tags

Page	Current Title	Length	Assessment
All pages (HTML)	"Zia Pizza - Premium Italian Pizza & Dining Westbury, Salisbury & Trowbridge"	76 chars	Same title for every URL (over 60 char ideal)
Salisbury (JS only)	"Pizza Delivery in Salisbury Best Pizza in Salisbury"	55 chars	Good, but invisible to non-JS crawlers
Westbury (JS only)	"Best Pizza in Westbury Pizza Delivery in Westbury"	53 chars	Good, but invisible to non-JS crawlers
Trowbridge (JS only)	"Pubs in Trowbridge Best Pubs in Trowbridge -- Zia Pizza"	59 chars	Good, but invisible to non-JS crawlers

4.2 Meta Descriptions

Page	Current Description	Length	Assessment
All pages (HTML)	"Experience authentic Italian pizza at Zia Pizza. Three premium locations in Westbury, Salisbury & Trowbridge..."	205 chars	Too long (max 155), identical for all URLs

Location pages (JS only)	Unique per location	Appropriate	Invisible to non-JS crawlers
-----------------------------	---------------------	-------------	------------------------------

4.3 Heading Hierarchy

Homepage:

Level	Content	Assessment
H1	"Welcome to Zia Pizza"	Good -- single H1
H2	"Where Italy Meets Britain", "Choose Your Location", "Special Offers" (x3 duplicate), "A Slice Above the Rest"	Duplicate H2s
H3	Full paragraph used as H3; "Two Ways to Experience Zia Pizza"; "All Current Offers"	Incorrect -- paragraph as heading

4.4 Image SEO Status

Metric	Value	Assessment
Total images referenced	22+	--
Images with alt text	3 of 22+	Critical gap
Images with descriptive filenames	~5 of 22+	Poor
Images with lazy loading	3 (iframes only)	No content image lazy loading
Images in WebP/AVIF	0	Not using modern formats
Images with srcset/responsive	0	No responsive images

Notable filename issues:

- `restaurant_image_lamb_on_the_strand` (typo: "restaurant")
- `restaurant_imgae_westbury` (double typo: "restaurant", "imgae")
- `100004.jpg` , `100006.jpg` , `image1.jpg` (non-descriptive names)

4.5 Open Graph & Social Tags

Tag	Value	Issue
og:title	"Zia Pizza - Premium Italian Pizza & Dining"	Static for all pages
og:description	Present	Static for all pages
og:type	"website"	OK
og:image	"/logo.png"	Relative path -- broken on social platforms
og:url	" https://ziapizza.co.uk "	Static -- always homepage
twitter:card	"summary_large_image"	OK
twitter:site	"@ziapizza"	OK
twitter:image	"/logo.png"	Relative path -- broken
twitter:title	Missing	Not set

twitter:description	Missing	Not set
---------------------	---------	---------

4.6 Internal Linking

Element	Status
Global navigation	Present: Home, Locations, Menu, Deals, About, Blog, Contact
Footer links	Present: Quick Links, Locations, Legal pages
Breadcrumbs	Not implemented
Contextual body links	Minimal
Blog link	Points to empty page
Cross-linking between locations	Present via order/booking CTAs

5. Site Performance & Core Web Vitals

5.1 Asset Sizes

Asset	Uncompressed	Gzipped	Assessment
HTML Shell	4 KB	~1.5 KB	Minimal (but empty)
Main JS Bundle	544 KB	159 KB	Large single bundle
CSS Bundle	85 KB	14 KB	Acceptable
Total Code	633 KB	176 KB	--
Total Images	~11.6 MB	N/A	Critical -- far too large

Largest Images

Image	Size	Format
About Us - Lasagne	1,106 KB	PNG (should be JPEG/WebP)
image1	785 KB	JPEG
About Us - Calzone	645 KB	JPEG
Menu scan page 1	635 KB	JPEG
Menu scan page 4	615 KB	JPEG
Offer - Tuesday BOGO	609 KB	JPEG
lamb_on_the_strand	519 KB	JPEG
westbury restaurant	500 KB	JPEG
logo1.png	394 KB	PNG
logo.png	277 KB	PNG

5.2 Connection Timing

Metric	Value
DNS Lookup	21ms
TCP Connect	235ms
TLS Handshake	456ms
Time to First Byte (TTFB)	671ms

5.3 Font Loading Impact

Font Family	Weights Loaded	Est. Size
Poppins	300, 400, 500, 600, 700, 800, 900 (7 weights)	~175 KB
Raleway	300, 400, 500, 600, 700 (5 weights)	~125 KB
Playfair Display	400, 500, 600, 700 (4 weights)	~120 KB
Inter	300, 400, 500, 600 (4 weights)	~100 KB
Italiana	400 (1 weight)	~25 KB
Total	~25 weight variants	~545 KB

Loading method: @import inside CSS (render-blocking chain: HTML -> CSS -> Google Fonts CSS -> Font files)

5.4 Core Web Vitals Risk Assessment

Metric	Google Target	Estimated Score	Risk Level
LCP (Largest Contentful Paint)	< 2.5s	5-8s	CRITICAL
INP (Interaction to Next Paint)	< 200ms	200-400ms	HIGH
CLS (Cumulative Layout Shift)	< 0.1	0.2-0.5	HIGH

5.5 Infrastructure

Feature	Status
Gzip compression	Enabled
Brotli compression	Not enabled
CDN	Not used
Code splitting	Minimal (2 chunks)
Static asset caching	1 year (good)
HTML caching	No cache (correct)
Service Worker / PWA	Not implemented
Manifest file	Returns SPA HTML (not actual manifest)

6. UI/UX Standing

6.1 Design System

Element	Current State
Theme	Dark only (navy/black background)
Primary Color	Red (hsl(357, 78%, 50%))
Accent Color	Gold (hsl(42, 35%, 70%))
Text Color	Near-white (hsl(0, 0%, 96%))
Body Font	Poppins (sans-serif)
Heading Font	Playfair Display (serif)
CSS Framework	Tailwind CSS
UI Components	Radix UI (headless accessible components)
Animations	Framer Motion (bounce, pulse, enter/exit, accordion)
Icons	Lucide React (36 icon references)

6.2 Design Quality Assessment

Aspect	Rating	Notes
Visual Appeal	7/10	Dark theme with red/gold accents creates upscale Italian atmosphere
Typography	5/10	Serif + sans-serif pairing is elegant, but 5 font families is excessive and inconsistent
Color Consistency	6/10	Consistent palette, but gold-on-dark contrast may not meet WCAG AA
Layout Structure	6/10	Responsive grid layouts work well on desktop; mobile needs testing
Animation Quality	5/10	Framer Motion adds polish, but multiple animation types may feel overwhelming
Brand Consistency	6/10	Strong on the site, but fragmented across social media and third-party platforms

6.3 Navigation & Information Architecture

Element	Assessment
Main Nav	Home, Locations, Menu, Deals, About, Blog, Contact -- logical structure
Footer	Quick Links, Locations, Legal -- comprehensive
Mobile Nav	Hamburger menu (responsive)
Breadcrumbs	Not present
Search	Not present
Blog Link	Points to empty page

6.4 User Journey Analysis

Journey: "I want to order pizza" Homepage -> "Order Online" CTA -> Choose location -> Exits to food-order.net (external domain)

Issue: User leaves ziapizza.co.uk entirely for the ordering flow. Brand continuity is broken.

Journey: "I want to see the menu" Click "Menu" -> See scanned JPEG images of physical menus

Issue: Menu images cannot be zoomed on mobile, text is small, items are not searchable, no dietary filters available.

Journey: "I want to book a table" Homepage -> "Book a Table" -> Choose location -> Exits to eposhybrid.uk (external domain)

Issue: Same domain exit as ordering.

6.5 Menu Page -- Critical UX Issue

The menu page displays **scanned photographs of physical menus** as JPEG images:

- Salisbury: 6 pages of scanned menus
- Westbury: 4 pages of scanned menus
- Trowbridge: 6 pages of scanned menus

Problems:

- Text is small and unreadable on mobile devices
- Cannot search, filter, or interact with menu items
- No dietary information filtering (vegetarian, vegan, gluten-free)
- Not accessible to screen readers
- Not indexable by search engines
- Each scan image is 300-650 KB (total ~7 MB for all menu images)

6.6 Accessibility Standing

WCAG 2.2 AA Criterion	Status	Details
1.1.1 Non-text Content	FAIL	Most images lack alt text; menu is image-only
1.3.1 Info and Relationships	FAIL	Static HTML has no semantic landmarks
1.4.3 Contrast (Minimum)	UNCERTAIN	Gold-on-dark needs verification
2.1.1 Keyboard	PARTIAL	Radix UI is accessible; custom components unknown
2.4.1 Bypass Blocks	FAIL	No skip navigation link
2.4.2 Page Titled	FAIL	Same title for all pages
3.1.1 Language of Page	PASS	<code>lang="en"</code> is set

ARIA usage in bundle:

- 11 `aria-label`, 5 `aria-hidden`, 4 `aria-live`, 3 `aria-expanded` instances
- Most ARIA comes from Radix UI library, not custom implementation
- Only 1 `sr-only` class usage (insufficient screen reader support)
- No `prefers-reduced-motion` support despite using animations
- No light/dark mode toggle

6.7 Mobile Experience

Aspect	Status
Viewport meta tag	Correctly set

Responsive breakpoints	sm/md/lg/xl/2xl (Tailwind defaults)
Touch targets	Appear appropriate (CSS analysis)
JS bundle on 3G	~15-20 seconds to first render
Menu readability on mobile	Illegible (scanned images)
PWA support	None
Add to Home Screen	Not supported

7. Competitive Analysis

7.1 Direct Local Competitors

Competitor	Location	Key Metrics
Caprinos Pizza	Westbury	5.0/5 Just Eat (1,400+ reviews), national chain (119 stores), own ordering system, 9,000+ Instagram followers
Nole Pizza	Salisbury	Professional website with schema markup, part of Chickpea Group, strong Instagram, sourdough specialist
Pizza Venti	Salisbury	Previously #1 restaurant in Wiltshire on TripAdvisor
PizzaExpress	Salisbury	National brand, massive SEO authority, loyalty program
Nerano	Devizes (10.7 mi)	Italian cuisine competitor in broader Wiltshire area

7.2 Competitive SEO Comparison

SEO Factor	Domino's (National)	Nole Pizza (Local)	Zia Pizza
Server-Side Rendering	Yes	Yes (WordPress)	No (SPA)
Schema Markup	Comprehensive	Basic (3 types)	None
Dedicated Location Pages	1,200+ local pages	Per-location	Minimal
Blog / Content Hub	Active	Some content	Empty
XML Sitemap	Yes	Yes	No
Backlink Profile	Very strong	Moderate	Weak
Google Business Profile	Fully optimized	Moderate	Basic
Review Volume (Google)	Massive	Growing	Low
Indexed Pages	Thousands	20-50	~6

7.3 National Market Context

Brand	UK Stores	Key Digital Advantage
Domino's	1,300+	1,200 SEO-optimized local pages, content hub, #1 in local rankings
Pizza Hut	350+	1.3M monthly website visits
Papa John's	400+	Established online ordering

PizzaExpress	350+	Strongest high-street brand
Franco Manca	70+	Artisan/Neapolitan positioning
Zia Pizza	3	Authentic product, but minimal digital presence

7.4 Keyword Landscape

Key target keywords and competitive difficulty:

Keyword	Est. Monthly Volume	Competition	Zia Pizza Ranking
"pizza delivery Salisbury"	100-500	Medium	Not ranking
"pizza delivery Westbury"	50-200	Low	Unknown
"best pizza Salisbury"	50-200	Medium	Not ranking
"Italian restaurant Salisbury"	100-300	Medium	Not ranking
"restaurants Trowbridge"	200-500	Medium	Not ranking
"pubs Trowbridge"	100-300	Medium	Not ranking
"pizza near me" (local pack)	10,000+	Very High	Not in local pack
"Italian restaurant Westbury"	20-100	Low	Unknown
"Sunday roast Trowbridge"	20-100	Low	Not ranking

7.5 Estimated Domain Authority

Based on analysis of indexed pages (~6), domain fragmentation, limited backlink profile, and thin content, the estimated domain authority of ziapizza.co.uk is **5-15 out of 100** -- significantly below local competitors.

8. Local SEO & Google Business Profile

8.1 Google Business Profile Status

Location	GBP Exists	Google Rating	Google Reviews	Assessment
Westbury	Yes	4.5/5	79	Moderate presence
Salisbury	Yes	Unknown	Very few	Needs development
Trowbridge	Yes	Unknown	Unknown	Needs development

8.2 NAP (Name, Address, Phone) Consistency

Issue Found	Details
Placeholder phone in codebase	+44 123 456 7890 appears in site code
Email inconsistency	Trowbridge uses semington@ziapizza.com (location is in Trowbridge, not Semington)
Name variations	"Zia Pizza", "Zia Pizza Express", "The Lamb on the Strand by Zia Pizza" -- different branding per location

8.3 Citation Profile

Confirmed directory listings: TripAdvisor (3), Facebook (3), Instagram (2-3), Just Eat, Deliveroo, Uber Eats, Google Business Profile, Restaurant Guru, Quandoo, Experience Salisbury, Yabli, Gourmet Society, Slurpy, Food Hygiene Ratings (food.gov.uk), Companies House, White Horse News (press)

8.4 Local Pack Visibility

Based on research, Zia Pizza does **not appear consistently in the Google Local Pack** (map results) for high-value queries like "pizza delivery [city]" or "Italian restaurant [city]" for any of its three locations.

9. Content Standing

9.1 Content Inventory

Page	Est. Word Count	Content Quality	Indexable
Homepage	300-400	Good copy, well-structured	Only with JS
About	500-700	Strong storytelling, good keywords	Only with JS
Location/Salisbury	300-500	Good local content with 7 FAQs	Only with JS
Location/Westbury	300-500	Good local content with 7 FAQs	Only with JS
Location/Trowbridge	200-300	Thinner content, 4 FAQs	Only with JS
Menu	0 (images only)	No text content	Not indexable
Deals	200-300	Basic offer listings	Only with JS
Blog	0	Completely empty	Nothing to index
Contact	100-200	Minimal	Only with JS
Privacy	2000+	Comprehensive legal	Only with JS
Terms	2000+	17 sections covered	Only with JS

Total indexable content (excluding legal pages): <2,000 words -- extremely thin for a multi-location restaurant business.

9.2 Content Strengths

- Compelling brand storytelling on the About page (origin story with Chef Vittorio and Zia Maria)
- Location pages include local keywords naturally
- FAQ content exists for all locations
- Deals content is regularly updated per location branch

9.3 Content Weaknesses

- Menu content is zero (trapped in scan images)
- Blog is empty (wasted SEO opportunity)
- Much location content is templated (city names swapped)
- No user-generated content (reviews, testimonials) on the site
- FAQ content is not marked up with schema

9.4 Deals & Offers Content

Deal	Description	Location
Sunday Roast	From GBP 14.95, served until sold out	--
Monday Funday	Carlsberg & Thatchers Gold GBP 2.95/pint	--
Tuesday Burger & Drink	Any burger + one drink for GBP 14.95	--
Wednesday Italian Buffet	Unlimited pizza & pasta, GBP 16.90/person	--
Thursday Steak Night	Sirloin steak + chips + salad for GBP 19.95	--
BOGO Pizza	Buy 1 Get 1 Free (equal/lesser value)	--
Half Price Pizza	Second pizza at half price	--
Kids Eat for GBP 1	Family-friendly Fridays	--
Double the Drinks	2 cocktails GBP 13.95, from 5 PM	--

10. Social Media & Online Presence

10.1 Current Accounts

Platform	Account	Followers	Status
Facebook (Westbury)	@ZiaPizza	934 likes	Active
Facebook (Salisbury)	@ziapizzasalisbury	Unknown	Active
Facebook (Trowbridge)	@ziapizzasemington	Unknown	Active
Instagram (Westbury)	@ziapizza_westbury	Unknown	Unknown
Instagram (Salisbury)	@ziapizza.salisbury	189	Active
Instagram (Trowbridge)	@thelambonthestrand.trowbridge	Unknown	Unknown
Twitter/X	@ziapizza	Unknown	Unknown
TikTok	Not found	N/A	Not present

10.2 Social Media Assessment

Aspect	Assessment
Account Fragmentation	6+ separate accounts across 2 platforms for 3 locations
Follower Counts	Very low (189 Instagram vs competitor's 9,000+)
Branding Consistency	Different naming conventions per location
TikTok Presence	None -- missing fastest-growing food content platform
Social Proof on Website	None -- no embedded feeds or review widgets
Instagram Indexing (since July 2025)	Unknown if accounts are set to Professional (required for Google indexing)

10.3 Third-Party Platform Presence

Platform	Status
Just Eat	Active -- Westbury has 610+ reviews, 4.77/5 rating
Uber Eats	Active across locations
Deliveroo	Active (Westbury confirmed, 32-min delivery estimate)
food-order.net	Direct ordering -- all 3 locations
eposhybrid.uk	Table booking -- all 3 locations

11. Review & Reputation Standing

11.1 Review Ratings by Platform

Westbury (Flagship)

Platform	Rating	Review Count
Google	4.5/5	79
TripAdvisor	4.7/5	130
Facebook	4.7/5	44
Just Eat	4.77/5	610
Restaurant Guru	4.6/5	330
Recommendation Rate	96%	--

Salisbury

Platform	Rating	Review Count
TripAdvisor	4.4/5	8
TripAdvisor Ranking	#70 of 164 restaurants	--

Trowbridge (The Lamb on the Strand)

Platform	Rating	Review Count
TripAdvisor	4.2/5	21
TripAdvisor Ranking	#26 of 77 restaurants	--

11.2 Review Sentiment Summary

Theme	Sentiment	Frequency
Pizza quality (thin crust, fresh)	Positive	High
Fresh ingredients	Positive	High

Friendly service	Positive	High
Good value (especially deals)	Positive	Medium
Dog-friendly (Trowbridge)	Positive	Medium
Bland flavors	Negative	Low
Pre-grated cheese	Negative	Low
Inconsistent quality (Trowbridge)	Negative	Low
Delivery timing	Negative	Low

11.3 Review Volume Gap vs Competitors

Metric	Zia Pizza Westbury	Caprinos Pizza Westbury
Just Eat Reviews	610	1,400+
Just Eat Rating	4.77/5	5.0/5
Google Reviews	79	Unknown (likely higher)

12. Privacy & Legal Compliance

12.1 Tracking Scripts Firing Without Consent

Script	Purpose	Privacy Impact
Google Tag Manager	Loads all other tags	Gateway for all tracking
Google Analytics 4	Browsing behavior collection	Moderate
Google Ads	Cross-site conversion tracking	High
Microsoft Clarity	Session recording (mouse, clicks, scrolls, forms)	Very High
Facebook/Meta Pixel	Cross-site retargeting	High

All 5 scripts fire immediately on page load with NO consent mechanism.

12.2 Compliance Assessment

Requirement	Status
UK GDPR Cookie Consent	FAIL -- No consent banner or CMP detected
PECR (UK ePrivacy Regulations)	FAIL -- Non-essential cookies set without consent
Microsoft Clarity Consent	FAIL -- Session recording requires explicit opt-in
Facebook Pixel Consent	FAIL -- Ad tracking without consent violates GDPR and Meta's ToS
Cookie Policy Page	Exists at /cookies route (content requires JS to view)
Privacy Policy Page	Exists at /privacy route -- comprehensive content
Terms Page	Exists at /terms route -- covers 17 legal sections

12.3 Risk Level

This represents the **highest-risk finding** in this audit. Under UK GDPR and PECR:

- Potential fines of up to 4% of annual turnover or GBP 17.5 million
- ICO enforcement notices possible
- Microsoft Clarity recording user sessions without consent is particularly high-risk

13. Overall Health Scorecard

Category Scores

Category	Score	Weight	Weighted Score	Key Issue
Technical SEO	2/10	20%	0.40	No SSR, no sitemap, no canonical tags
On-Page SEO	3/10	15%	0.45	Static meta tags, missing alt text, broken OG
Site Performance	3/10	15%	0.45	544 KB JS bundle, 11.6 MB images, no CDN
UI/UX Design	5/10	15%	0.75	Good visual design, terrible menu UX
Local SEO	3/10	10%	0.30	Unoptimized GBP, NAP inconsistency
Content	2/10	10%	0.20	Empty blog, image-only menu, thin content
Accessibility	2/10	5%	0.10	No alt text, no landmarks, menu inaccessible
Privacy Compliance	1/10	5%	0.05	5 tracking scripts, zero consent
Social Media	3/10	5%	0.15	Fragmented, low followers, no TikTok
Overall		100%	2.85/10	Critical attention needed

Summary by Severity

Critical Issues (Immediate Attention Required)

1. GDPR non-compliance -- 5 tracking scripts without consent
2. No server-side rendering -- blank pages for most crawlers
3. No XML sitemap
4. No structured data / schema markup
5. Domain fragmentation across 3+ domains
6. www/non-www duplicate content
7. Menu pages as scanned images (inaccessible, not indexable)

High-Priority Issues

8. 11.6 MB unoptimized image payload
9. 544 KB monolithic JS bundle with minimal code splitting
10. 5 font families with 25 weight variants
11. Missing canonical tags on all pages
12. Open Graph images using relative paths
13. Soft 404s (HTTP 200 for non-existent pages)

14. No CDN or Brotli compression
15. Missing Content-Security-Policy header

Medium-Priority Issues

16. Empty blog page in navigation
17. Low review volume (Salisbury: 8 TripAdvisor reviews)
18. NAP inconsistencies across platforms
19. Placeholder phone number in codebase
20. No breadcrumb navigation
21. No prefers-reduced-motion support
22. No PWA / service worker
23. Fragmented social media accounts

14. Sources & References

Primary Data Sources

- Website technical analysis via HTTP requests and source code inspection (April 2026)
- Google search results and SERP analysis
- TripAdvisor, Facebook, Just Eat, Deliveroo, and Uber Eats platform data
